d'approvisionnement

## Maintaining the Compendium

Since post-secondary institutions and industry organizations are constantly revising and expanding their programs in supply chain management and logistics, the content of the compendium will require updating on a regular basis.

**Changes to compendium information can be sent to [info@supplychaincanada.org](mailto:info@supplychaincanada.org).** Please provide complete information as shown below:

- **is this a change to an existing listing or a new listing?**
- the name of the college or university
- the program name, as well as the name of the faculty or program area through which the program is offered
- the language or languages in which the program is offered
- pre-requisite courses
- the credential that is earned upon completion (e.g., a degree, diploma, certificate)
- the duration of the program
- titles of courses included in the program
- whether or not the program includes a co-op component
- a website address
- city and province
- the NOC code and function related to each course
- notes
- your name, title and contact information

See the compendium for examples of current programs.

**Please be sure to note if the information you're sending relates to an already-listed program. For example, if the name of a program changes, be sure to identify the name under which it is currently listed, so that updates are made correctly.**

The CSCSC will also endeavour to fully review the compendium contents on an annual basis to provide as accurate-as-possible information.
