

# Do you help young people as they're making career decisions?

Consider the **SUPPLY CHAIN**, where work can be **DIVERSE, CHALLENGING** and **REWARDING**

The Canadian Supply Chain Sector Council can help you help students as they decide on their future paths. The Council provides:

- Supply chain practitioners to speak to your students about their experiences and career opportunities in the supply chain
- A searchable education and training compendium that provides information about supply chain offerings across Canada
- A three-minute video that can be used to introduce supply chain careers to students; it shows the diversity and importance of work in this field
- Four video career profiles that showcase roles in different areas of the supply chain, featuring individuals who are passionate about their work in the sector
- Occupational standards that describe supply chain roles and the education and attributes that qualify people to do them
- Supply chain facts and figures, definitions and terminology
- Loads of online career information and career-awareness brochures
